FINALLY, TRULY RELIABLE AND FAST FIBER BROADBAND INTERNET FOR ALBURGH!

Matrix requires 460 households to show interest now by “pre-subscribing” (without obligation) to plan the network.
matrixconnectedfiber.com/alburgh

- Total installation fee is \$400 - \$200 due about 3 months prior to construction (refundable), and \$200 at time of construction (financing available).
- The basic plan provides unlimited data at 100 Mbps, and costs \$95/month. There is also a special plan providing 25 Mbps at \$45/month for families with a student who is income eligible under the National School Lunch Program.
- More robust plans are available (200 | 500 | Gig) and Internet Phone (unlimited calling to the US and Canada).
- If things go as planned, the network will be up-and-running sometime between Fall '22-Summer'23.
- Fiber is super fast and reliable because unlike copper wire (DSL), coaxial (Cable TV), and satellite internet networks, fiber optic cables are made of glass, and can transmit data at the speed of light.
